1.0 HISTORICAL DOCUMENTATION OF MILL

1.1 HISTORICAL SUMMARY OF COOVER AND STEVENSON MILL

The Coover and Stevenson Mill, likely the same mill as the Stevenson Mill (#145) and also known as the Coover and Stephenson Mill, Coover and Harris Mill, the Pioneer Mill, and Stevenson's Mill, was located in lower Gold Hill along Main Street below the Belcher dump (Ansari 1989:48; *Gold Hill Daily News* 1863:3; Science Applications International Company [SAIC] 1993:80; Shinn 1980: 82). The mill began operations on August 31, 1860, and was one of the first steam-powered mills along the Comstock. The owners attempted to open the first mill in the district, but they ordered their machinery too late (on June 21, 1860 [Lord 1959:86]) and started operations three hours after Almarin B. Paul's Mill (Ansari 1989:48; *Gold Hill Daily News* 1863:3; Historic American Engineering Record [HAER] 1980). Charles S. Coover and Dr. E.B. Harris from Amador County, California were the original owners, hence the alternative name of Coover & Harris Mill. The mill had one eight-stamp Howland rotary battery, a 15 horsepower steam engine and nine Knox pans with steam chambers (HAER 1980). This mill had a daily capacity of six tons (Ansari 1989:48). This mill was one of the first mills to use the Washoe process (Oberbillig 1967:15), though it originally used dry crushing and then used Paul's Concentrators and Knox pans (De Quille 1889:72). The mill processed tailings from the Rice & Company claim, located in Gold Hill by James Finney (Lord 1959:86) as well as both Bowers and Plato mine ore (Ansari 1989:48). The mill originally worked gold quartz (De Quille 1889:72). A survey map from 1861 shows the Coover and Harris Mill (Figure 1).

In 1862, the mill employed five men to oversee the Paul's Concentrator and Knox pans (Kelly 1862:170). In 1863, a 12 horsepower engine powered the eight stamps and nine pans (*Gold Hill Daily News* 1863:3). Charles S. Coover served as superintendent of the mill (HAER 1980). In 1865, the mill had a 12 horsepower steam engine that used 2½ cords of wood per day, 8 stamps, 12 pans, and had a daily capacity of six tons. The mill employed six men (Ansari 1989:48). In 1866, the mill had a capacity of 10 tons per day (Ansari 1989:48). In 1869, the mill had 12 amalgamating pans and one battery. The last title document to mention the mill was dated to October 21, 1869 (SAIC 1993:80). It appears that the mill may have had up to 12 stamps at some point during its period of operation (Oberbillig 1967:15). The mill was eventually dismantled when the city widened Main Street and the machinery was moved to eastern Nevada (Ansari 1989:48).

A Historic American Engineering Record report was performed in June 1980 at this site (HAER 1980).

2.8 Coover and Stevenson Mill

The Coover and Stevenson Mill was also known as the Coover and Harris Mill, the Pioneer Mill, and Stevenson's Mill (A-1;A008125) (A-2;A008010) (B-14;A008573). According to Eliot Lord, it was the second mill in the Territory to begin operations, in August 1860 (A-7;A008067). Hochholzer's 1865 map placed Stevenson's Mill between the Gold Hill Mill and Rhode Island Mill, on Lot 31, Block 5, Range C (Lot 31) (B-12;A002002). This corresponds to current Tax Assessor Parcel No. 02-071-14 (Map 3.1).

A survey for Charles S. Coover and E. B. Harris dated May 10, 1861 placed the Coover and Harris Mill on a 1.14-acre parcel (Map 8). On June 17, 1861, Robert Jones and Jane Jones conveyed a lot with a 120-foot frontage on Main Street, between the Gossage lot on the north and a lot on the south occupied by Charles Coover and E. B. Harris, to Charles Coover and E. B. Harris (copy not requested). On October 3, 1861, E. B. Harris conveyed an undivided one-third interest in the Coover and Harris Mill and lot as surveyed, measuring 200 feet by 200 feet, to C. S. Coover (J-1). The mill was described as having nine Knox amalgamating pans and one Howland Battery (J-1). Chas. S. Coover quitclaimed a one-half interest in the Coover and Harris Mill, again described as having nine Knox amalgamating pans and one Howland Battery, and associated lot to C. C. Stevenson on March 7, 1863 (J-2).

In 1863, Kelly's Second Directory reported that the Coover and Stevenson Mill was situated in Gold Cañon in the town of Gold Hill. The mill had 8 stamps and 9 amalgamating pans (A-1;A008125).

Collins' 1864 Directory stated that the Pioneer Mill was erected in 1860, that it had 8 stamps and 9 amalgamating pans, and that Coover and Stephenson [sic] were the proprietors (A-2;A008010).

Charles S. Coover and C. C. Stevenson mortgaged the Coover and Harris Quartz Mill to John Arnold and William Blauvelt on January 22, 1864 (copy not requested). On March 12, 1864, Charles S. Coover mortgaged the mill to John W. Gashwiler (copy not requested).

The June 27, 1865 edition of the *Gold Hill News* noted that Stevenson's Mill was owned by C. C. Stevenson and situated in the lower part of Gold Hill, next below the Gold Hill Mill. It reportedly had 8 stamps, 12 amalgamating pans and worked 6 tons of ore per day (B-14;A008573).

On May 1, 1865, Charles C. Stevenson conveyed a one-half interest in the Coover and Stevenson Mill to William Sharon (J-3).

The 1866 State Mineralogist Report described a Stevenson's Mill as having 8 stamps, 10 pans and a crushing capacity of 10 tons per day (A-3;A008519).

On October 21, 1869, William Sharon quitclaimed a one-half interest in the Coover and Stevenson Mill and lot to Charles C. Stevenson (J-4). This document describes the mill as including 12 amalgamating pans and one battery.

Description and Plot of survey of Mill &
 Canon, about one half mile South Easterly from Gold Hill, Ca
 Territory. Surveyed for Charles S Coover and E B Ho
 County Surveyor.

Map 8

Subsequent title documents for the property associated with the Coover and Stevenson Mill did not mention a mill. The February 3, 1877 edition of the *Mining and Scientific Press* stated that the Coover Mill in Gold Hill was built by Charles S. Coover and Dr. E. B. Harris, that it commenced operations in August of 1860, and that it was torn down when Main Street was widened and the machinery removed to eastern Nevada (A-9;A005091).

C. C. Stevenson quitclaimed his interest in the south 166 feet of Lot 31 to James Boysen on May 6, 1871 (J-5). The United States granted Charles C. Stevenson a patent for Lot 31 on May 5, 1875 (J-6).

Lot 31 was conveyed in portions to private individuals from this point until March 25, 1922, when Joseph Gillett conveyed an unspecified portion of Lot 31 to The United Comstock Mines Company (J-7 through J-20). The source of Joseph Gillett's interest was not determined. On November 19, 1924, The United Comstock Mines Company conveyed the easterly portion of the north 100 feet of Lot 31, and a right-of-way across the westerly portion, to Comstock Merger Mines, Inc. (J-22). Comstock Merger Mines, Inc. conveyed all of its lots in the town of Gold Hill to Sutro Tunnel Coalition, Inc. on June 9, 1928 (J-23). Sutro Tunnel Coalition, Inc. conveyed the east half of the north 100 feet of Lot 31 to M. A. Holcombe on October 1, 1934 (J-24). With the exception of an interest held by the John G. West Trust from 1957 to 1962 (J-31 through J-37), Lot 31 was again conveyed between private individuals through the present time.

A survey performed for Ulan Pinkston and filed August 7, 1981 showed the "Jane Abbey Parcel," described as a portion of Lots 31 and 32 (Map 9).

SOURCE: DRAFT INTERIM RPT OF THE
QUARTZ MILLS OF GOLD HILL
& AMERICAN FLAT, 10/7/92 SAC

are talking of putting out for Lemhi as soon as spring fairly opens.

OREGON.

From the *Oregonian*: We have a letter from Auburn which states that the new mines, 70 miles south of that place, are very extensive. Prospectors have struck a creek at a place where immigrants crossed it at an early day, and find considerable quantities of gold. One man took out \$600 in 13 days. It may be that this is one of the places where the immigrants, who came by "Meek's cut-off," discovered the gold of which everybody has heard so often.

Elk Creek Dist., in the John Day country, is one of the richest quartz mining localities in Oregon. Some of the rock from that district shows \$270 per ton of gold.

The *Umatilla Press* says that the Lawrence Bros. have discovered a silver lode on their ranch on Butter Creek, in this county. Ore therefrom has been sent to Portland for assay.

The *Jacksonville Sentinel* says the tunneling in Gold Hill is still progressing, with good prospects of success. The ledge has been struck again, and the miners are running a shaft from the tunnel to the surface—a distance of 120 ft.

MONTANA.

From the *Post* of March 30th: Hendry's mill cleaned up on last Saturday, from an eight day's run on Whitlatch Union ore, with 18 stamps, 32½ ozs. of retort, valued at \$5,832.

Prof. Charles Rumley assayed some ore from the Copperopolis lode, Muscleshell Dist., which yielded 41½ per cent. pure copper.

Mr. Pfel has organized a company in St. Joseph, Mo., with a capital of \$100,000 to put a mill on the Alameda lode. Mr. Isaacs, agent for a New York company, has also purchased two mills, one for the Summit Dist. and another to work on the Alameda.

The St. Louis and Montana smelting works yesterday cupelled the largest silver brick which has yet been produced. It is circular in form, 28 in. in diameter, 1½ in. thick, and weighs 120 lbs. This splendid piece of silver is the product of 7½ tons of ore from the Legal Tender lode. Notwithstanding the many adverse circumstances against which he had to contend, such as poor coal, the extreme cold, etc., Mr. Philip Deidesheimer has so altered and improved the works that they may now be pronounced a complete success.

Letter to same from Atlantic City, Lost Horse Gulch, says: That new camp—Eagle Gulch—is prospecting even better than at

NEVADA.

Esmeralda.

From the *Aurora Union* of April 6th: Over three tons of bullion from the Cornucopia mine, Partzwick, are lying in Wells, Fargo & Co.'s office, in this place, waiting for shipment. Over 150 lbs. of bullion from the Diana has been shipped within the past week and plenty more at the mine waiting transportation; also \$3,500 worth of bullion has been shipped from Aurora in the meantime.

Humboldt.

From the *Register* of April 6th: M. Torrey is progressing finely with his mining operations. He has one large furnace, superior to anything of the kind in the State, nearly completed, and is getting everything else in good shape. His mines in Arabia are turning out to be all he could hope. He has ore now piled up on his dumps of the value of \$80,000 at the lowest estimate. Yesterday he commenced hauling this ore to his reduction works.

Reese River.

From the *Reveille* of April 6th: Yesterday there were brought into town from the Knickerbocker mill, near Ione, 1,156 ozs. of bullion.

In the Reville Dist. prospects are reported flattering. Several owners of mines are engaged in getting out ore for the Rutland mill. The Crescent, Mediterranean and Atlantic, of the Reville company, are yielding abundantly of ore that would work from \$100 to \$150 per ton.

Same of 8th: The Hopkins tunnel, which is to the rich belt through Lander Hill what the Suto tunnel is to the Comstock lode, is now in nearly 400 ft. It is the property of the Revenue Extension Co.

As wonderful as is the general character of the ore yielded by the Highbridge, it appears to improve and increase in richness as depth is attained. We were shown this morning a very beautiful specimen of mineral from the shaft of the Combination Co., at the depth of 170 ft. The piece is purplish black, and of remarkable gravity, and masses of it have returned \$10,000 of silver per ton. As rich as the mineral is, it is the predominant one in the Silver Bend and the Empire districts.

Same of 9th: Eleven bars of bullion were brought into town to-day from the mill of the Twin River Co. . . . Yesterday, 2,713 ozs. of crude bullion came in from the mill of the Social and Steptoe Co. at Egan Cañon.

The Keystone mill, which commenced running on Feb. 5th, continued without interruption for 50 days, during which time it reduced 543 tons of ore, yielding on an

that a considerable portion of it will work at the mill near \$5,000 per ton. A 40-stamp mill is to be erected at once.

The Rutland mill is 60 miles southeast of Belmont. It has five stamps of 600 lbs., and three of Wheeler's improved pans. It was to be set in motion on the 10th inst. Roasting furnaces are to be erected as soon as the weather becomes settled; meanwhile the wet crushing will be tried. The ore now on hand is from the Mediterranean, Crescent and Atlantic, and is estimated at an average of \$100 per ton. Some good ore has also been taken from the Mohaska ledge.

Washoe.

[In the Stock Circular, in another portion of this paper, will be found late mining news from this district.]

From the *Territorial Enterprise* of April 8th: Everything in the cañon below Gold Hill is lively. All the mills are pounding away on full supplies of ore. At this time, the price of reducing ore to within a certain per cent. of the assay is \$15 per ton.

Same of 9th: The new shaft of the Imperial and Empire companies, being worked conjointly, is now 850 ft. deep. New and substantial hoisting works of the most powerful description will be erected, the grading for which will commence in a day or two.

The amount for which Col. Buel's property changed hands, is variously estimated at from \$160,000 to \$300,000 in gold coin.

A body of very rich ore, five feet thick, was struck on Saturday last at the 500-ft. level of the Crown Point mine, in the front ledge. Considerable excitement was created by this new development, which promises to be an extensive one.

The Bowers and Plato has stopped hoisting ore for a few days, to put in a new reel, and make other improvements. When the works again start they will be able to hoist about 150 tons of ore every 24 hours.

From same of 12th: The new and powerful hoisting works of the Empire and Imperial will be in running order by Aug. 1st.

The eight-inch pump, running at the rate of eight strokes or revolutions per minute, is only able to keep the body of water recently struck in the Crown Point mine at a stand-still, and prevent its rising to the 500-ft. level, where the late rich strike of ore was made.

Same of 13th: The following is a statement of the amount of bullion shipped during the past week: From the office of Wells, Fargo & Co., in this city, there were shipped 4,347 lbs. of assayed bullion, valued at \$174,872.87; from their office in Gold Hill, 2,539 lbs. valued at \$69,761.61.

From the *Trepass* of April 9th: The ledge

on steadily. . . . In the Yellow Jacket, a drift west of the 500 ft. level has cut a streak of rich ore. About 200 tons are shipped daily. . . . In the Overman but little work is being done, except to keep the mine free from water.

From the *Gold Hill News* of April 8th: As soon as the ledge is tapped in the Imperial mine we may look for active operations in all mines from the Bullion to the Yellow Jacket. As the great quantity of water with which they have to contend is what has caused them all to suspend operations in the lower levels, within the next four months there will be more known of the permanency of the Comstock ledge than has ever before been developed.

Same of 9th: The Ceresus is preparing for a further development of its claim.

We paid a visit to the Crown Point yesterday. We saw a small pile of ore from the 500-ft. level, not the smallest piece of which but showed black sulphuret of silver; and in many specimens native silver was to be seen. Stock in all the claims in Lower Gold Hill has gone up in consequence of the strike.

Same of 10th: We saw this morning a small bar from Mount Blanc ore worked at Rigby's mill. The bar contained \$41.86—divided as follows: Gold, \$14.94; silver, \$26.92. The silver is .951 fine.

WASHINGTON.

The *Lewiston Journal* of March 22d says: We learn by a party just from the Sound, that new discoveries of rich silver quartz were made a few days since on the Skagit river, nearly opposite Port Townsend. The specimens show an abundance of free silver. The party who made the discovery is not anxious to have the facts known, but the news has leaked out, and caused quite a sensation in the towns on the Sound, and parties are daily leaving for the mines.

PURE AIR FOR MINES.—We understand that the first plunger air machine, where the air is first compressed on cold spring water, before entering the lungs, was erected at the Ophir mine, on the Comstock lode—greatly to the health of the miner and profit of the company—by Capt. Wm. Williams, a practical mining engineer, now of this city, whose card appears in another column. This machine forced into the mine 48,324 cubic feet of air to a six-foot stroke, and is so simple in construction as to require only one-half the power of one man to operate it.

such property? It is a nuisance where it stands and should be removed by the most expeditious legal means, and no other. When our city authorities find out what is the matter we hope that the wrong, whatever it is, may be righted "by the most expeditious legal means, and no other." Such is our prayer. Let our authorities do nothing except by the "most expeditious legal means." Let there be no irregular proceedings against said building. The days of the "Vigilantes" are past. Its being advertised "to rent" is of course against the building, yet keep cool and proceed only by the "most expeditious legal means."

FROM LONE PINE.—We were yesterday shown some very fine specimens of ore from Lone Pine, Inyo County, California. The majority of the specimens are argentiferous silicates, but very rich in silver—so rich as to wholly destroy the regular silicate crystallization. Among other curious mineral specimens was a large piece of asbestos, so pure that it could be twisted into strings. This mineral has been tried by the Mexicans as a lining (mixed with clay) for furnaces, but it does not seem to answer the intended purpose as well as bone ashes, which is now generally used.

Under the heading of "Pretty Sight" an evening cotemporary says: "What is? Why, a ship under full sail, or (we'll ship the sailor's second), a train of cars in motion, or—next to 'em—the stages of Wells, Fargo & Co.—three six-horses coaches—rolling out of Virginia at 6 o'clock every evening. They prance forth line. You take notice. We would advise the passengers of the above to look at the head for a month or two. They prance forth line. Good-bye!"

IN OPERATION.—At present we do not know of an idle mill in the State. All are at work, and there is ore for all. Many of our leading mills are increasing their capacity, and on every side are to be seen signs of the prosperity of our young State. It is not only in mills, but in every branch of trade and industry, that we see improvements throughout the city. Business houses are being enlarged and refitted, and new houses are daily being opened.

THE GOLD HILL FAIR.—The Fair in Gold Hill, given by the ladies of St. Patrick's Church, is proving to be a most successful venture. The hall is crowded nightly, and there can be but little doubt that a sum sufficient to liquidate all the debts standing against the church edifice will be realized. It will continue during the week and will wind up in a grand ball next Monday night. Let our people go down and assist their neighbors of Gold Hill.

BLACK CABOX.—The attendance at the Cook last night was good, and a high old performance was given. All kinds of fun—songs, dances, juggling, acts, and farces. No restriction upon anybody; lager beer drinking and smoking allowed, and all given the liberty of moving about and singing and doing pretty much as they please, so long as they do not interfere with the enjoyment of others. The bill for to-night is an excellent one.

INSURE AGAINST ACCIDENTS.—Go to Sprague, Gould & Curry office, and be insured against accidents. In case you are hurt after being insured you get a liberal weekly allowance until you are able to work. This is better than insuring your life, for once you are dead the money of the insurance companies will be of mighty little use to you. They can give you no checks that will pay for grub in that "bourne from whence no traveler returns" to curse his bunk.

LIBERTY HOSE CO. No. 1.—At the annual election of officers of Liberty Hose Company No. 1 of Gold Hill, held at their hall last night before last, the following named gentlemen were chosen as officers for the ensuing year: A. A. Putnam, Foreman; S. A. Holden, First Assistant; S. A. Winterbauer,

Legal Tenders.
SAN FRANCISCO, August 8.
Legal tenders, 7 1/2% asked.

FROM SAN FRANCISCO.
[SPECIAL DISPATCH TO THE ENTERPRISE.]

Body Identified—Heavy Attachment Suits—Another Death from Yellow Fever on the Beasler—Insolvents—Legal Tenders—Exchange—Excursion—Appointment—Governor Stanley's Speech—Democratic Nominations—Etc.

SAN FRANCISCO, August 8.
J. H. Allen, Secretary of the San Francisco Benevolent Association, last evening identified the body of the man who died suddenly at the Portsmouth House as that of Henry Terry, formerly a soldier.

The following attachment suits have been commenced against the firm of Wightman & Harute: In the Fourth District Court, John Parrott & Co. for \$10,000; Jos. A. Donahoe and Eugene Kelly \$12,000; in the Twelfth District Court, L. Struts & Co. for \$8,000; Leland Freres for \$6,500; Rodgers, Weyer & Co. \$12,000; Unifield, Cohn & Co. \$3,020; D. A. Walter & Co. \$6,500; Daniel Meyer, \$2,877; J. Kohn, \$21,480; in the Fifteenth District Court, Hyneman & Co. for \$2,495; D. Packs & Co. \$4,041; H. O. Harding, \$10,000; J. Godechaux & Co. \$6,004; P. F. Loughran & Co. \$2,050; making a total of \$150,702.

A seaman on the Rozaca, who was attacked by yellow fever shortly after the arrival of the vessel here, died yesterday. This is the first case which has developed and terminated fatally here.

The following persons, resident in this city, have filed petitions in insolvency with the United States Registrar of Bankruptcy: Alonzo Tarr, Geo. W. Ward, D. D. R. Steward, Alonzo Hoy, O. B. Adams.

Yesterday officer Lynes gave himself into custody on the charge of manslaughter in shooting the ex-convict prisoner, Louis Asimels, and was

short engagement in San Francisco and then
 visit New York.
 Black Crook.—The Crook still keeps on
 the even tenor of its way with a large troupe
 of melodrama actors and actresses, introduc-
 ing new features almost nightly. The place
 is devoted to fun and all is free and easy
 throughout. A duo bill will be presented
 this evening.
 New Boilers.—The Yellow Jacket Com-
 pany have just received and will at once
 set up two new boilers, each 16 feet in length
 by 54 inches in diameter. Each boiler con-
 tains 50 three-inch tubes. The boilers were
 manufactured at the Pioneer Boiler Works.
 The omnibus line plying between this city
 and Gold Hill is being well patronized this
 summer. Our people all seem to have made
 up their minds that it is much cheaper to
 pay two bits for a ride than to walk during
 the hot weather.
 Nor So.—There was a report on the street
 that evening that a miner in the Chollar-
 Potosi had been caved on and fatally injured.
 Upon tracing the matter up we found that a
 workman in the mine had sprained himself.
 No life—no smashing of bones!
 Overhauling.—The Kentucky Company
 are engaged in overhauling their hoisting
 works. They are putting in new reels, re-
 pairing their shafts, and putting everything
 in order for a long siege of heavy work.
 Low Fare.—The old line of Dayton stages
 having that town in the morning charges
 but four bits to this city and intermediate
 points. Nobody can complain of this as
 extortionate.
 Our Markets are well supplied with ap-
 ples, peaches, plums, pears, grapes and
 every other kind of fruit now in season—
 watermelons and muskmelons are also
 plenty.
 For Sunday Accommodation.—After this
 date the stage office of Wells, Fargo & Co.
 will be open on Sundays from 2 to 4 o'clock
 p. m., for the accommodation of those wish-
 ing to secure seats in the stages to California.
 The Corro Gordo mines are still well
 spoken of. Partlow who left this city a few
 weeks since to look after interests in various
 leads in that section expresses themselves as
 being perfectly satisfied with their mines.
 Pioneer teams, loaded with merchandise
 for our business houses, continue to throng
 our streets. Our merchants appear to be
 determined to take time by the forelock this
 season.
 Telegraphic.—There are messages at the
 Telegraph office for the following persons:
 Miguel Kelly and C. Morales or Lottio Mo-
 rales.
 New Appointment.—Mr. A. Baker has
 been appointed route agent for the western
 division of the Overland Stage Company.
 Large quantities of wood are now com-
 ing into the city from Washoe. Ten cords
 of wood seem to be a load by no means uncom-
 mon.
 All our mills are now at work day and
 night, and we hear no complaint of a scarcity
 of wood.
 Good Sport.—There is said to be very
 good shooting just now about Pearis—
 the game being grouse and sage hens.

Notice to Invalids.
 ALL PERSONS WHO HAVE NO HOME NOR
 place where they can receive the attention
 necessary to their comfort, when ill, can find at
 the County Hospital comfortable private rooms,
 where they will be attended upon by kind and
 experienced nurses, and be supplied with every
 thing necessary to their comfort.
 THE ROOMS are entirely separated from the
 ward occupied by the indigent sick.
 The Hospital is under the care of Dr. BRON-
 SON, who can be found at his office, corner of C
 and Taylor streets, over Fenner's store, every
 day between the hours of 12 m. and 2 p. m. Ar-
 rangements can also be made with Mr. Cronch,
 Superintendent of the Hospital, who can always
 be found at the Hospital Buildings.

NOTICE IN BANKRUPTCY.—THIS
 is to give notice that, on the thirteenth day of Au-
 gust, 1887, a warrant in bankruptcy was issued
 against the estate of JAMES H. FENNER, of Washoe
 County, in said district, who has been adjudged a bankrupt,
 on his own petition; that the payment of any debts and
 delivery of any property belonging to such bankrupt to
 him, or for his use, and the transfer of any property by
 him, are forbidden by law; that a meeting of the cred-
 itors of the said bankrupt, to prove their debts and to
 choose one or more assignees of his estate, will be held
 at a Court of Bankruptcy, to be holden at the office of
 Mr. J. KELLY, a Register in Bankruptcy of said Court,
 No. 33 South C street, in Virginia City, Storey County,
 Nevada, before said Register, on the nineteenth day of
 September, A. D. 1887, at 10 o'clock a. m.
 E. IRWIN,

HAPPINESS OR MISERY?
THAT IS THE QUESTION.
 THE PROPRIETORS OF THE "PACIFIC MU-
 seum of Anatomy and Science" have deter-
 mined, regardless of expense, to give FREE (for
 the benefit of suffering humanity) four of their
 most interesting and instructive Lectures on
 Minors, and its disqualifications: Nervous
 Debility, Premature Decline of Manhood, Indi-
 gestion, Weakness, Depression, Loss of Energy
 and Vital Power, the Great Social Evil, and those
 maladies that result from youthful follies, ex-
 cesses of intemperance, or ignorance of Physiology
 and Nature's Laws.
 These invaluable Lectures have been the means
 of enlightening and saving thousands, and will
 be forwarded FREE on receipt of Twenty-five
 Cents in postage stamps, on addressing "Society
 for Pacific Museum of Anatomy and Science,"
 Montgomery street, San Francisco.
 Letters to be sent through Wells, Fargo

* Soon will be 1,200 per month.

† 750 tons per month; October 15, 1866.

‡ Now 2,800 tons.

NOTES ON MILLS.

STOREY COUNTY.

- Bowers* (1)—Paid this for 5 months only; has been idle four months; new running with own water; (2) 5-foot pans.
- Central* (1)—To Virginia and Gold Hill Water Companies; also, pays \$— to Ophir Company.
- (2)—Hepburn and Paterson's, working 500 tons per month wet; four furnaces and 16 barrels, working 170 tons dry.
- Crown Point* (1)—Just dismantled; engine used to drain mine.
- Connet* (1)—Been idle for seven months; just started again.
- Douglas* (1)—10-inch cylinder, 30-inch stroke, 26 plain pans.
- Empire No. 1* (1)—Increasing stamps to 21; capacity to be 40 tons per day; to employ 16 men, 27 Wakelee pans.
- Empire No. 2* (1)—Concentrators and two stamps for breaking.
- Empire State* (1)—4-foot pans.
- Gold Hill* (1)—6-foot tubs.
- Hoosier State* (1)—With steam chambers.
- Land's* (1)—Throughout the table designates Blake's breakers.
- Mariposa* (1)—Also one prospecting stamp; (2) large.
- Marysville* (1)—30 5-foot plain pans.
- Pacific* (1)—Large.
- Helaluma* (1)—Stamps being increased to 16; capacity to 26 tons per day; men to 11; wood to five cords; adding eight improved Wheeler pans, four settlers and one agitator.
- Puite* (1)—8-foot settlers.
- Rhode Island* (1)—18-inch cylinder; (2) 7-foot pans.
- Rigby's* (1)—One extra pan and settler for tailings and one barrel.
- Rogers's* (1)—Not running for four months.
- Saphire* (1)—Wheeler.
- Simcoe* (1)—Improved.
- Stevenson* (1)—8½-inch cylinder; (2) Howland's rotary battery; can crush seven tons and amalgamate five tons per day; (3) small.
- Succor* (1)—24 Wakelee flat-bottomed pans.
- Summit* (1)—Burnt and rebuilt in 1863; (2) small pan and settler.

LYON COUNTY.

- Birdsall* (1)—Mill, \$110,000; ditch, \$40,000; total, \$150,000.
- Carpenter* (2)—Large-sized Wheeler.
- Dayton No. 1* (1)—Four of these for prospecting; (2) 8-foot settlers; (3) Knox.
- Dayton No. 2* (1)—Two roasting furnaces.
- Eastern Slope* (1)—Large.
- Eureka* (1)—Break 80 tons per day.
- G. C. Reduction Works* (1)—5-foot pans.
- Imperial Rock Pt.* (1)—7-foot tubs and settlers; (2) breaker, large size.
- Phoenix No. 1* (1)—Eight tubs and Wheeler pans.
- Pioneer* (1)—15 tubs and Wheeler pans.
- Sacramento* (1)—12 7-foot iron pans.
- Swansea* (1)—6-foot tubs and one prospecting battery and pan.
- Trench* (1)—16 flat 7-foot pans, one excelsior and two Wheeler and Randall pans.
- Weston's (Steam)* (1)—Worked but about 1,000 tons of Comstock ore this year; hauling about \$3 per ton.
- Weston's (Water)* (1)—Six flat-bottomed pans; has run but little this year for want of water.

ORMSBY COUNTY.

- Merrimac* (1)—Also, one prospecting battery and pan; (2) large.
- Mexican* (1)—Four furnaces and 10 barrels.
- Indian* (1)—Hanscom's.

WASHOE COUNTY.

- Manhattan* (1)—16 pans.
- Ophir* (1)—Working but 36 stamps—Freiberg process—nine furnaces.
- Reduction Works*—24 amalgamating barrels.
- Temelec* (1)—Large.
- Washoe Valley* (1)—Wheeler 12-foot breast; full capacity about 300 horse-power.
- Reduction Works*—40 stamps used for Freiberg process, and 20 for wet; eight furnaces and 20 barrels for dry process; four Wheeler and Randall's pans for wet; four more Varney pans to be introduced; (2) Blake's improved saw.

REPORT
OF
J. ROSS BROWNE

ON THE
MINERAL RESOURCES

OF THE
STATES AND TERRITORIES WEST OF THE ROCKY MOUNTAINS.

PUBLISHED BY H. H. BANCROFT & CO.,
SAN FRANCISCO, CALIFORNIA.
1868.

BELCHER.

Within the past two years twenty thousand tons of ore, yielding on an average \$17 per ton, have been obtained from this mine, nearly all from the upper levels. The deepest openings are eight hundred and fifty feet below the surface. At this depth the vein is nearly barren, showing only traces of gold and silver.

LUCERNE MINE.

This mine is situated near Devil's Gate, Silver City, southeast from Gold Hill. It is opened by a shaft and tunnels to the depth of three hundred feet. The vein is well defined and the walls have clay linings. The ore produces on an average \$10 per ton. The bullion assays \$3 50 per ounce in silver, and \$6 50 in gold. The ore is easily reduced, and the mine is worked without difficulty. The vein dips east about 45°. The country rock on the west is granite; on the east it is propolite.

WALLER'S DEFEAT, ST. LOUIS, SUCCOR,

And other mines are on the same vein, and are worked very similarly to the Lucerne, and have the same characteristics and productiveness.

LYON COUNTY.

The natural resources described in my last report as peculiar to this county, have undergone but little change. Some developments have been made, but the results are not particularly marked. Public schools and churches have been prospered, and some improvements are perceptible.

The official returns fix the popular vote, at the last general election, at six hundred and thirteen, being two hundred and eighteen less than the vote cast two years ago.

The mines in Spring Valley District, three miles west from Dayton, have recently received some attention—several abandoned claims have been relocated, and a mill with ten stamps is being erected.

In Devil's Gate District, ore of a low grade is being extracted from the Hope, Buckeye and other mines. These mines were never developed to a great extent, and will probably produce large quantities of ore.

Owing to the fine water privileges afforded by the Carson River, and the facilities of access to the mines, principally in Storey County, there are a large number of mills in Lyon County.

The Atlanta has ten stamps and six pans.

The Birdsell has thirty stamps and forty pans.

The Bacon has twenty stamps and ten pans.

The Carson Valley has twenty stamps and ten pans.

The Daney has twenty stamps and ten pans.

Dayton Reduction has six pans.

Devil's Gate has twelve stamps and ten pans.

Excelsior has ten stamps and twenty pans.

Eureka has twenty stamps and eight pans.

Eagle Mill has two pans and four arastras.

Franklin has ten stamps and four pans.

Hope has ten stamps and six pans.

Island has ten stamps and four pans.

Illinois has twenty stamps and six pans.

Keystone has five stamps and six pans.

Kelsey has fifteen stamps and six pans.

Pioneer has fifteen stamps and ten pans.

Phoenix has fifteen stamps and ten pans.

Rock Point has fifty-six stamps and forty-three pans.

Swansea has twelve stamps and ten pans.

Sacramento has fifteen stamps and eight pans.

San Francisco has ten stamps and eight pans.

Sherman has five stamps and four pans.

Tailings Mill has two pans.

Woodworth has twenty-four stamps and twelve pans.

Winter's has two stamps, two pans and two arastras.

Weston has fifteen stamps and nine pans.

French has twenty stamps and eighteen pans.

The copper mines, twenty-five miles southeast from Dayton, are not worked.

SUTRO TUNNEL.

This tunnel was commenced in 1869, and has been prosecuted with commendable energy. It is run westward from the face of the foot-hills north of Dayton, so as to intersect the Comstock ledge at right angles at the depth of two thousand one hundred and seventy-two feet. It has been driven sixteen hundred and fifty feet. A stream, affording about twenty-five inches of water, flows from it. No valuable veins of ore have as yet been found.

It is proper to state that a large number of the mills are not running, the supply of ore having ceased.

CHURCHILL COUNTY.

There has been but little progress in the developments of the natural resources of this county within the past two years. The completion of the Central Pacific Railroad withdrew the travel and transportation almost entirely from the Overland Mail Road; consequently business ceased, and many of the stations along that road have been abandoned. The agricultural lands along the Carson River and about the Carson Lake and Sink have produced well.

The popular vote of the county at the late general election was eighty-seven; sixty-four votes less than were cast in November, 1868.

The soda mine, near Ragtown, has been opened to the depth of twelve or fifteen feet. It is situated in a small basin on the southwestern border of the desert surrounding the sink of the Carson and Humboldt Rivers. There is a pond or small lake near by, perhaps three quarters of a mile in length and from a quarter to half a mile in width, and said to be of great depth.

The water collects in the soda basin during the rainy season, and afterward gradually evaporates, leaving the soda beautifully crystalized over a space of from one to two acres in extent. From the developments recently made, it seems that this deposit has an unknown depth, and consists

35 horsepower steam engine using 3 1/2 cords of wood per day; it had 14 pans in the amalgamating department, a capacity of 8 1/2 tons a day, and 8 employees (Bancroft, 1862, map; GHN, 1865, June 27, 3:2; Kelly, 1862, 72; SMR, 1866, 148).

Sunderland Mill: In the early 1870s this 10-stamp mill had a capacity of 15 tons a day and was milling ore from the Belcher Mine. It was located on the east side of Main Street in Gold Hill immediately south of the Crown Point Mine. According to Myron Angel, in 1875 it was owned by the Union Mill & Mining Co., of which William Sharon was president (Angel, 1881, 594; Sanborn-Perris Map Co., 1877, sh. 11; SMR, 1871-72, 138).

Granite Mill: In 1863 the *Gold Hill News* wrote that this was the only mill in Nevada Territory built of granite and considered to be fireproof. It was erected in 1861 in Gold Hill. In 1862 Kelly's directory reported that its main building measured 43 x 86 feet and that it possessed 20 stamps which could crush 25 tons per day. In 1865 the *Gold Hill News* described it as having a 45 horsepower steam engine using 4 1/2 cords of wood per day, 16 stamps, 8 Wheeler pans, a 28-ton-per-day capacity, and 10 employees. In 1867 it was refurbished, and in 1870 its machinery was moved to White Pine County, Nevada (GHN, 1863, Dec. 17, 3:1; 1865, June 27, 3:2; Kelly, 1862, 172; SCR, Locations, 1863, v.A, 171, sketch map; TE, 1867, Jan. 12, 3:1; 1870, Feb. 19, 3:2).

Comet Mill: West Gold Hill reduction facility reported in 1865 to have a 45 horsepower steam engine using 5 cords of wood per day, 16 stamps, 32 Brevoort pans, a 20-ton-per-day capacity, and 11 employees. The 1866 *State Mineralogist's Report* listed the same number of stamps and capacity. The mill was dismantled in 1868 (GHN, 1865, June 27, 3:2; SMR, 1866, 148; TE, 1868, Oct. 7, 3:1).

Gold Hill Mill: The Gold Hill Mining Co. built this mill in Gold Hill in 1861. Its main building measured about 35 x 74 feet. In 1865 it was reported to be a 14-stamp mill with a 36 horsepower engine using 3 cords of wood a day, 24 amalgamators, an 18-ton-a-day capacity, and 13 employees. In the early 1870s it had only 8 stamps and was reported to be inactive because of lack of wood. It was dismantled in 1875 (Bancroft, 1862, map; GHN, 1865, June 27, 3:2; Kelly, 1862, 171; SMR, 1871-72, 138; TE, 1875, Apr. 9, 3:1).

Coover & Stevenson Mill: This mill had the distinction of being one of the first steam mills to be erected on the Comstock. It was located on Main Street in lower Gold Hill and was reported to have started operations in August 1860. Some accounts list it as being the first steam mill on the Comstock, but it appears to have opened on the same day as Almarin B. Paul's Pioneer Mill near Devils Gate in the Silver City District. Originally the facility was known as the Coover & Harris Mill for its proprietors, Charles S. Coover and Dr. E.B. Harris. At that time it processed ore from the Bowers and Plato mines and had 8 stamps with a capacity of 6 tons per day. Later the mill was sold to C.C. Stevenson. In 1865 the *Gold Hill News* wrote that it was located below the Gold Hill Mill and had a 12 horsepower engine using 2 1/4 cords of wood per day, 8 stamps, 12 pans, a capacity of 6 tons per day, and 6 employees. In 1866 its capacity was reported to have increased to 10 tons per day. When the facility stood in the way of widening Main Street, it was torn down, and the machinery was moved to eastern Nevada. It was sometimes referred to as the Pioneer Mill (Angel, 1881, 68; Bancroft, 1862, map; Comstock Paper No. 15, M & SP, 1877, v. 34, Feb. 3, 73; GHN, 1865, June 27, 3:2; Kelly, 1862, 170; SMR, 1866, 148).

Overman Mill: The sheet-metal exterior of this 500-ton-a-day cyanide plant, which operated in the late 1930s and early 1940s, stands on the east side of what was in the early 1980s the Houston International Minerals Corp.'s access road between Gold Hill and American Flat. The mill was built and operated by the Consolidated Chollar, Gould & Savage Mining Co. (Stoddard, 1950, 38-39).

WILLIAM SHARON PURCHASES
COOVER & STEVENSON MILL

W. A. Chandler
John P. Daly

~~On this 5th day of July A.D. one thousand eight hundred and sixty five before me Henry M. Morgan and Mary Cullen in and for said County personally appeared J. M. Sharon, W. A. Chandler, John P. Daly, known to be the persons described in and who executed the foregoing instrument who they severally and each for himself acknowledged to me that they executed the same freely and voluntarily and for the purposes therein mentioned. Witness my hand and official seal the date last above in this certificate written.~~

~~H. M. Morgan Notary Public
State of Nevada, County of Storey, May 3 1865 at 5:30 pm past 9 a.m.~~

Wm. Stevenson 3 To B. New Stamp 4 So. S. 4
This instrument made the first day of May in the year of our Lord one thousand eight hundred and sixty five between William Sharon of the State of Idaho, the first party of the first part and William Sharon of Virginia City, party of the second part witnesses that the said party of the first part for and in consideration of the sum of four thousand dollars lawful money of the United States of America to him in hand paid, the receipt whereof is hereby acknowledged, hath granted, conveyed, sold, remised, conveyed and quit claimed unto the said party of the second part and to his heirs and assigns forever all that right title and interest of the said party of the first part here and to one undivided half of that certain certain mill with the late improvements, which stand situated in the Town of Silver Hill, Storey County, said State and known as the Mill of Coover and Stevenson and located on the East side of the road leading from Cold Hill to Silver City, consisting of a large Engine and fixtures, one of Howard's Batteries, a lot of Iron Anvil and stone with all the machinery belonging thereto, together with all the property consisting of two houses, one stable and land bounded on the north by the George estate running South two hundred feet, then East two hundred feet, then North two hundred feet, then West two hundred feet to place of beginning. Together with all and singular the tenements, hereditaments and appurtenances thereto belonging and the rents, issues and profits thereof. To have and to hold all and singular the above described premises together with the appurtenances unto the said party of the second part, his heirs and assigns forever. In Witness Whereof the said party of the first part has hereunto set his hand and seal the day and year first above written.

Signed, Sealed and Delivered in the presence of
H. M. Morgan
State of Nevada, County of Storey 3

On this third day of May A.D. one thousand eight hundred and sixty five before me Henry M. Morgan and Mary Cullen in and for said County personally appeared W. A. Stevenson known to be the person described in and who executed the foregoing instrument who he acknowledged to me that he executed the same freely and voluntarily and for the purposes therein mentioned. Witness my hand and official seal the date last above in this certificate written.

H. M. Morgan Notary Public
